JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Ten Thousand Smokes, which it is expected to continue after the war.

The party this year entered the region from the Bering Sea side of the Alaska peninsula rather than from the Pacific as heretofore. The ship that carried them, the *Dora*, was one of those caught by the unusually bad ice conditions this spring in Bering Sea and for two days was seriously hampered by the ice floes, which made navigation precarious, but, although warned by the coast guard cutter to turn back, she finally made her way through the ice without mishap. When last heard from on June 10, the expedition was camped at the foot of Naknek Lake prepared to plunge into the wilderness.

THE BROOKLYN BOTANIC GARDEN

On June 13 the treasurer of the Brooklyn Institute of Arts and Sciences received from two anonymous donors a gift of securities of the par value of ten thousand dollars, as an addition to the permanent endowment of the Brooklyn Botanic Garden, and to be known as the Benjamin Stuart Gager Memorial Fund. At the request of the donors, the income from this fund is to be expended for publications for the library or otherwise as the present director of the garden may designate.

The chairman of the Brooklyn Botanic Garden Governing Committee, Mr. Alfred T. White, has made provision for several prizes for 1918 and annually thereafter. The most important of these prizes is a scholarship of the value of \$100 to be awarded to the boy or girl who has taken class work at the Brooklyn Botanic Garden for not less than three years, and who has shown marked ability along botanical and agricultural lines, both at the Garden and in his high-school courses, as attested by his principal and teachers. This will be known as the Alfred T. White Scholarship, and will be awarded for the first time in 1920. Further information may be obtained by addressing the director of the Garden.

Details as to this and some of the other prizes are published in the Brooklyn Botanic Garden *Leaflet* of June 20, 1918. Special men-

tion, however, should here be made of the offer of two first and two second prizes (one for boys and the other for girls) of War Savings Stamps to the value of \$15 and \$10, respectively, for excellence in back-yard gardens; and of two other prizes (one for boys and one for girls) of \$10 each, in War Savings Stamps, for making the best use of a plot of ground in the children's gardens at the Brooklyn Botanic Garden.

In addition to the above, twenty prizes of ten Thrift Stamps each (ten to boys and ten to girls) will be awarded to those who are most generally helpful in connection with the children's garden at the Botanic Garden. Promptness, regularity of attendance, effort, accomplishment and other points will form the basis of this award. The War Savings Stamps and Thrift Stamps will be awarded only for the period of the present war.

THE CHEMICAL WARFARE SERVICE

The following statement is authorized by the Secretary of War:

The organization of the Chemical Warfare Service has been completed. Henceforth all phases of gas warfare will be under the control of the Chemical Warfare Service commanded by Major-General William L. Sibert.

Heretofore chemical warfare has been carried on by divisions in the Medical Department, the Ordnance Department, and the Bureau of Mines. All officers and men who have been connected with offensive or defensive gas warfare here will be responsible to the Chemical Warfare Service. The field training section at present in under the Corps of Engineers.

Defensive warfare has been under the control of the Medical Department. This work has consisted of the designing and manufacture of masks both for men and animals and the procurement of appliances for clearing trenches and dugouts of gas.

Offensive gas warfare consists principally of manufacturing gases and filling gas shells. The work has been under the direction of the Ordnance Department.

The new department will take over the work
